# IDrive® e2 Features

Cloud Object Replication

Event Notifications

Bucket Logging

faster local access.

when files are added, modified, or deleted.

## Edge locations

Create a storage near your end-users for faster network and ease of access.

## Ransomware protection

Protect against data loss from malware attacks with file lock, versioning, data retention.

## Object lock

Object locking brings immutability to the objects and protects your data from cybersecurity threats and maintain regulatory compliance.

based on the bucket retention policy. Retrieve objects in case of accidental overwrites or deletion.

physical and biometric security, and all transfers are secured with TLS protocol and offers encryption at rest.

anywhere via an easy-to-navigate web-based console.

## IDrive® e2 Public Buckets

Set up public access for your IDrive® e2 buckets and manage access permissions for your public data.

## Cloud Data Migration

Move data directly from other cloud storage providers to IDrive® e2 at no additional cost or tool requirement. IDrive® e2 offers cloud data migration for FREE.

## Data Lake Storage

Store massive volumes of raw data - structured, semi-structured, or unstructured - affordably in IDrive® e2 hot object storage.

## Multi-cloud compatible

Build a flexible, robust, and portable multi-cloud infrastructure with reduced costs, enhanced performance, integration support, and data security features.

## IDrive™ e2 for Snowflake

Snowflake users can store data on IDrive® e2 and use it to create Snowflake database tables. They can also store Snowflake External stage and External tables.

## IDrive® e2 with MSP360

Configure IDrive® e2 hot cloud object storage with MSP360 backup software and store your data affordably and securely.

# The cloud storage that meets all your needs

## IaaS

Store application data in distributed endpoints that are closer to your users. Run APIs, development kits, and services over a geographically-connected network of servers.

## Data backup and archival

Safeguard your organization's systems, servers, NAS devices, VMs, Veeam, and workstations by storing the data in the cloud. Transfer data from local storage or another cloud storage.

## Manage media workflow

Store petabytes of photo, video, and audio files from the cloud without making changes to your workflows. Archive active and inactive media workflow with your preferred media management tools.

## AI/ML Projects

Store large data sets affordably in the cloud. Implement artificial intelligence and machine learning systems to analyze, learn, and predict from the data.

## Video surveillance

Access, manage, and secure data from CCTV systems, IP cameras, NVRs, and VSaaS platforms with scalable and affordable, hot cloud object storage.

# Compatible clients to use with IDrive® e2

Automate regular backups of your Google Workspace data for all users to the cloud.

Available with 

Secure data across Microsoft Office 365 apps with automated regular cloud backups.

Available with 

Safeguard your Drive and Team Folders data with 3 times daily automated backup.

Available with 

Keep your Drive data safe from loss and ransomware by backing up to the cloud.

Transfer your backed up data to IDrive® e2 via Veeam Backup and Replication tool.

Manage your backed up data on IDrive® e2 as a Network or External Drive via MSP360.

Use MSP360 CloudBerry to mount your cloud storage as a network drive to your Windows workstation or Windows Server.

Use MSP360 CloudBerry Explorer to access, move, and manage files between your local storage and IDrive® e2 Cloud Storage account.

Use MSP360 Managed Backup Service (MBS) with IDrive® e2 to automate and secure server backups offsite.

Integrate Ahsay and store your data in the IDrive® e2 cloud.

Acronis Cyber Protect Cloud with IDrive® e2 to data backup with AI-based antivirus, anti-malware, and endpoint protection.

Streamline your workflow and collaboration with IDrive® e2 and Anchorpoit integration.

Integrate AirLiveDrive with IDrive® e2 to access cloud storage as a local disk drive.

Secure your media files by integrating IDrive® e2 hot cloud storage and Archiware P5.

Create a secondary repository for your arcserve data in the IDrive® e2 cloud storage.

Replicate your Arcserve ShadowProtect backup images to IDrive® e2 Hot Cloud Storage.

Configure and manage your backed up data on IDrive® e2 cloud storage using Arq.

Use BackupAssist with IDrive® e2 hot cloud storage to store data backups from physical and virtual Windows servers.

your content delivery with  
bunny.net.

with Chronosync and access  
via IDrive® e2.

IDrive® e2 to store and  
manage files in a single place.

Access and manage your  
IDrive® e2 cloud storage via  
Cloudflare.

Whitelabeled, high  
performing backup solution  
for IT providers.

Upload and restore  
Couchbase Files to IDrive® e2  
with ease.

Back up your websites and  
servers using IDrive® e2 with  
cPanel for reliable and secure  
additional storage options.

Configure CrossFTP with  
IDrive® e2 hot cloud storage  
to speed up your uploads and  
downloads.

Store data with IDrive® e2  
and collaborate in real-time  
using the CuttingRoom video  
editor.

Backup your Microsoft 365 data, shared drive, website data, contacts, and calendar locally or to IDrive® e2 hot cloud storage.

Access and manage your IDrive® e2 cloud storage using a Cyberduck connection.

Dell PowerProtect Data Domain's Cloud Tier supports IDrive® e2 hot Cloud Storage for standard-infrequent-access storage classes.

Upload files to IDrive® e2 Hot Cloud Storage and share it easily with anyone.

Backup your computers with Duplicacy and store the data in an IDrive® e2 bucket.

Store, access, and manage your data backups on IDrive® e2 via Duplicati.

affordably and securely.

from these applications.

improve user experience.

Upload files to IDrive® e2 Hot Cloud Storage and manage file transfer workload.

Seamlessly transfer files from your IDrive® e2 Cloud Storage with Filezilla Pro.

Use Flexify.IO to transfer data from your Amazon S3 buckets to IDrive® e2.

Backup and sync to and from your IDrive® e2 cloud storage.

Use IDrive® e2 Cloud Storage with Hammerspace as a storage volume to read and write data.

Upload media files to IDrive® e2 Hot Cloud Storage and manage media workflow.

Integrate Hitachi Content Platform (HCP) with IDrive® e2 for efficient object data tiering.

iconik is a media asset management tool makes easy to organize, search, and work with your files stored on IDrive® e2.

Use Iperius to backup your data to IDrive® e2 hot cloud storage.

Store your iRODS data in IDrive® e2 cloud object storage

Use IDrive® e2 as a reliable storage destination for your JetBackup5.

Store your LucidLink filespace data in IDrive® e2 securely

e2 with MILESTONE PROJECT.

MOUNTAIN DUCK.

your data stored on IDrive® e2 accounts.

Connect to cloud object storage as a local drive.

Use NAKIVO to send backups of VMs and physical machines to your IDrive® e2 cloud account.

Access IDrive® e2 Storage with transparency and optimum productivity.

Use NirvaShare to share your files/folders stored on IDrive® e2 hot cloud storage with external users with ease.

Connect to NovaBACKUP via IDrive® e2 and offer backup and DRaaS.

Use odrive to access IDrive® e2 and other cloud storage from one platform.

Photos+ is an iOS app that lets you store your photos in IDrive® e2 cloud object storage.

Backup your files from Pure Storage FlashBlade device in the affordable IDrive® e2 hot cloud storage.

Access and manage the data in your qBackup account with IDrive® e2 Storage.

Backup your QNAP NAS devices with IDrive® e2 via QNAP Backup.

Use Quest Rapid Recovery with IDrive® e2 to connect to the cloud for data archiving and rapid disaster recovery.

Sync your backed up data from IDrive® e2 cloud storage to rclone.

and windows systems to various storage options.

with IDrive® e2 Storage.

your IDrive® e2 buckets.

Upload or download data on IDrive® e2 hot cloud storage.

Use this solution with IDrive® e2 for seamless data storage, and secure access to data.

Use with IDrive® e2 to speed up your downloads and uploads with higher-throughput transfers.

Access IDrive® e2 buckets as a local filesystem with this client.

Access your cloud data on IDrive® e2 securely using the SFTPCloud service.

Connect IDrive® e2 cloud storage with SimpleBackups and secure the data from your server, and cloud storage.

Create a Snowflake External Table and use it to reference data residing in IDrive® e2.

Use SyncBackPro to backup your Windows and Windows Servers to IDrive® e2 hot cloud storage with ease.

Access, manage, and backup files on IDrive® e2 Cloud Storage via Syncovery.

Use Synology Cloud Sync to synchronize your local NAS data with public cloud or on-premises storage.

Backup your Synology NAS devices with IDrive® e2 via Hyper Backup.

Manage files on your IDrive® e2 account using the Transmit's 'dual-pane'.

e2 cloud storage.

WordPress site.

by integrating Vantage  
Gateway to IDrive® e2.

Backup all your data to a  
single platform with Vembu  
BDR Suite and IDrive® e2  
integration.

Comprehensive data  
management using IDrive® e2  
and Veritas integration.

Access and manage your  
IDrive® e2 buckets using  
WinSCP.
